

## QA & DevOps SD-WAN Engineer

**Location: Massy, France**

**Department: R&D – SDx and Cloud**

**Contract: Full time**

**Telework options: hybrid on site – remote (up to 3 days home office per week)**

*Looking for an exciting and permanent job in a fast-growing high-tech company, offering an international team with a great environment?*

### Job Context

We provide **open, trusted** and **innovative network connectivity** and enable our **customers' success** by delivering **high value-added** software-driven solutions. Today, over 120 international service providers, including numerous Tier 1 carriers around the world, trust our people and technologies. Over 50% of our over 500-strong team works in our multi-national Agile R&D centers. Our company has a strong international background, with sales offices strategically located around the world. For 20 years, Ekinops has been driving innovation in network systems. As a leader on Business Gateways for Edge Internet through its OneAccess brand, Ekinops has launched its SD-WAN solution that allows users to benefit from the wide set of OneAccess products secured and interconnected using the Compose Software platform.

To enhance and expand the solution, Ekinops GitOps team is seeking a DevOps software engineer who will contribute to build up our pipelines and improve our test automation tools.

### Responsibilities

As a part of the SD-WAN team, you will have the following responsibilities:

- Design, develop and document pipelines
- Design and automate SDWAN at scale solution tests
- Share the usage of the automated frameworks within the team
- Produce efficient and elegant code based on requirements
- Troubleshoot, debug, maintain and improve software at scale
- Disseminate your knowledge to help increase the skills and know-hows of the team in your areas of expertise

## Profile and skills

An autonomous, proactive, DevOps engineer with the following skills and experience:

- Engineering or Master degree in networking and Computer Science or related field with at least 2 year of experience
- Know-how in Python development
- Understanding of Git
- Knowledge in build and delivery process using GitLab pipelines
- Knowledge in Robot framework to manage End to End testing
- Experience in automation scripting (Ansible)
- Solid experience in Linux environment and networking
- Xray experience is a plus
- ISTQB certification is a plus
- Excellent communication skills
- Fluent in both English and French (oral, written)
- Capacity to work in collaborative agile environment

## Package

- Fix and annual bonus in package
- Possibility to work remotely 3 days per week
- Profit sharing program
- Meal subsidy

## Recruitment process

3 interviews

- 1<sup>st</sup> with Department Director
- 2<sup>nd</sup> interview with HR
- 3<sup>rd</sup> interview with Senior Director

## To apply

Ekinops endeavors to be an employer of choice. Our teams are dedicated, imaginative and astute. We strive to work together around our core values, which includes dynamism, empowerment and customer focus. Apply using the online form directly from the opportunity page.
