

Empowering networks

Ekinops provides carrier-grade Transport and Access solutions to support Service Providers in facing the evolving network demand.

3 ranges : Ekinops360 for innovative transport solutions, OneAccess for branch access solutions with a multi-services approach and Compose for software-managed network solutions.

Ekinops360 provides agile solutions to deliver ultra-low latency and high capacity for all transport segments: Metro, Enterprise, Sub-marine, Long-haul.

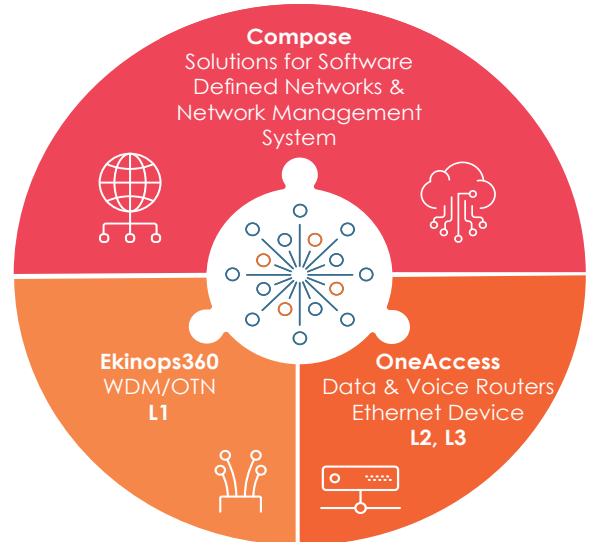

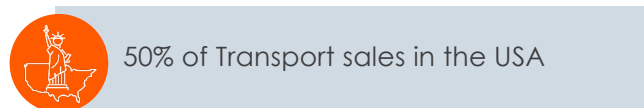

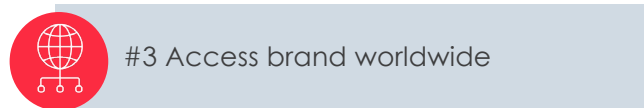

OneAccess provides agility, performance and flexibility to the edge with devices & multi-services software that support corporate branch deployment.

Compose adds value to networks through a software-defined approach. Compose augments networks with, amongst others, virtualized services, SD-WAN, and security.

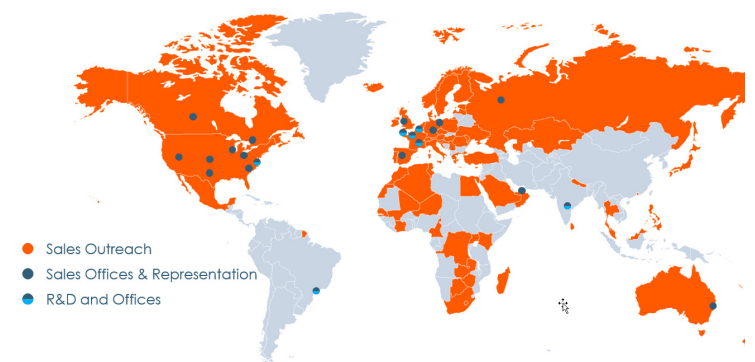

Innovative

- ~460 staff - 50% within R&D
- 6 R&D centers: 3 x France, Belgium, Brazil and India
- Virtualization pioneer
- Turning networks "software-defined" and highly scalable, from level 1 to 3
- Advancing high-speed optics through multiple consortia projects with industry and university research eco-system partners

Global footprint

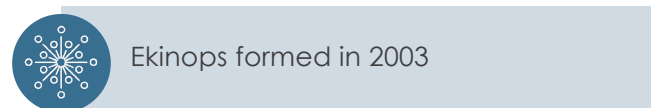

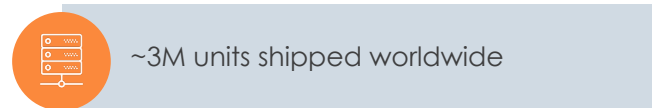

Ekinops is an international company with offices and partners located around the world.

Service providers' trusted partner

Major global service providers have already chosen Ekinops to enhance their infrastructure and managed services portfolio for enterprise customers. Ekinops supplies 16 of the top 30* Tiers 1 and 34 from the top 100 service providers in the world.

OUR MARKET DIFFERENTIATORS FOR SERVICE PROVIDERS

Open

- No vendor lock-in
- Multi-APIs (NETCONF / YANG, REST, etc.)
- Orchestrators agnostic
- 3rd party VNFs certification
- Alien wavelengths
- Collaborative customer relationship

Simple

- Proven carrier-grade solutions
- 1 platform for multiple business services
- 1 chassis for all performances
- Drag & drop UI, ease of integration
- Wide services options

Future-proof

- Journey towards virtualization & "software defined" without disruption
- Up to 10Gbps for branches and 600Gbps coherent Transport
- Programmable architecture
- Alliances program & certification
- Strong R&D investment

SHAPING THE FUTURE OF COMMUNICATION SERVICES

The delivery model of network services is changing; Ekinops is the ideal partner for Service Providers as they transition to next generation networks including SD-WAN.

- Strong investor in the latest technologies including NFV, SD-WAN and Cloud
- We deliver complete end-to-end optical transport solutions
- We are building next-generation solutions for Service Providers
