PRESS RELEASE

# Ekinops Redefines Optical Network Capacity for Telegraph42 Long-Haul Network

**Paris, 22 july 2025 – Ekinops (Euronext Paris - FR0011466069 – EKI),** a leading optical transport and network access specialist for enterprise-trusted connectivity solutions, today announced that it has been selected as strategical Technology partner by Telegraph42 Management GmbH, the Germany-based leading transmission capacity and fiber connections provider in Eurasia region to upgrade its international traffic bandwidth.

Telegraph42 is a pioneer in creating and building new high-speed, low-latency data transmission channels in Eurasia region.

The project started in May 2024, implemented an alien wavelength solution over an existing network using the Ekinops PM 200FRS02-2 platform to deliver a 100G wavelength service to a high profile Telegraph42 telecom partner in region. A highly powerful long-haul solution which is very cost effective due to the non-regenerated transmission distance, Ekinops for years has deployed alien waves for customers using its FlexRate™ technology over equipment from virtually every DWDM manufacturer. Ekinops expertise in alien wavelength deployment assures operators that they can get a smooth, trouble-free operation of alien waves in their network.

"Ekinops provided a platform for a high-performance long-haul solution. The technical and local knowledge as well as experience of the Ekinops' team was unsurpassed, and the solution was impressively cost effective", said **Mr. Waldemar Sterz, CEO**, **Telegraph42**.

"The additional network capacity has future-proofed our network substantially to match bandwidth requirements", added **Valerii Yasynovsky, CTO, Telegraph42**.

"We are glad to support Telegraph42 in achieving their mission of providing a solution to improve IP transit performance in the region. Much of the region depends on the connectivity services provided by Telegraph42 so it is vital that its network capacity stays well ahead of customer demand," commented **Frank Dedobbeleer, Chief Revenue Officer Group EMEA & APAC at Ekinops**."

**About EKINOPS**

Ekinops is a leading provider of open, trusted and innovative network connectivity solutions to service providers around the world. Our programmable and highly scalable solutions enable the fast, flexible, and cost-effective deployment of new services for both high-speed, high-capacity optical transport as well as virtualization-enabled managed enterprise services.

Our product portfolio consists of three highly complementary product and service sets: EKINOPS360, OneAccess and Compose.

- EKINOPS360 provides optical transport solutions for metro, regional and long-distance networks with WDM for high-capacity point-to-point, ring, and optical mesh architectures.
- OneAccess offers a wide choice of physical and virtualized deployment options for Layer 2 and Layer 3 access network functions.
- Compose supports service providers in making their networks software-defined with a variety of software management tools and services, including the scalable SD-WAN Xpress, Nuvla Edge-to-Cloud and Olfeo SSE solutions.

As service providers embrace SDN and NFV deployment models, Ekinops enables future-proofed deployment today, enabling operators to seamlessly migrate to an open, virtualized delivery model at a time of their choosing.

Ekinops (EKI) - a public company traded on the Euronext Paris exchange operates globally.
